Enchantment Workshops Clarification Statement

Ben Gallaway is the Director of Enchantment Workshops, and has been an Addiction Counselor for over 20 years. The counseling he does is separate from the educational Workshops provided by Enchantment Workshops.

The Workshops are Educational in Nature. In our Workshops, the educational materials will be reviewed in depth and experiential learning techniques will help to integrate the information. We will assess and outline ongoing Therapy work as facilitators and may even make Treatment recommendations. This is not Therapy or Treatment though. The process with Enchantment Workshops will give you much needed information that should greatly enhance your Therapy experience in the future. Delicate feelings may arise as a result of the process and our goal will be to Educate and build strength through the integration and presentation of useful and relevant information.

Enchantment Workshops is not a State Licensed Inpatient or Outpatient Treatment Facility. The State of Arizona allows for Educational Workshops to be done without licensing the facility. Treatment, which is much more in depth, can only be done with a License. An overnight stay with us does not imply treatment.

We would be glad to discuss the differences in Therapy, Specific Treatment and Educational Workshops further at any time if you would like.
